West Chester Dentistry & Wellness

Dental Care Guide

WEST CHESTER, OHIO

Dr. Phuoc Tran, DDS

WEST CHESTER DENTISTRY & WELLNESS

Personal care, built on trust.

Dr. Phuoc Tran has practiced dentistry since 1996. His approach brings modern dental technology together with attentive, family-focused care. He helps patients understand their options and builds a plan around their individual needs.

Bring your questions, share what matters to you and take time to understand your options. Your care begins with a conversation and an individual plan.

Dr. Lauren Tran, DDS

WEST CHESTER DENTISTRY & WELLNESS

Thoughtful care. A familiar team.

Dr. Lauren Tran focuses on clear explanations, patient comfort and care for every age. She listens to your concerns and helps you understand preventive, restorative and cosmetic options.

Bring your questions, share what matters to you and take time to understand your options. Your care begins with a conversation and an individual plan.

About our practice

Our practice brings modern dental technology and attentive, family-focused care together in one familiar setting. Your questions and your goals shape the conversation.

Our approach

Care works best when people feel listened to, informed and supported. Start with clear explanations, explore the options and build a plan around your individual needs.

Your dental team includes Dr. Phuoc Tran, Dr. Lauren Tran, Dr. Sarah Bui and Dr. Varena Farid. The proposed FACE | BODY | MIND treatment menu in this review awaits the practice's confirmation.

Prevention & family care

Care for every generation.

A conversation about your care

Routine exams and cleanings give your dentist a chance to assess your teeth and gums, discuss home care and plan next steps. Bring your questions and tell the team about changes in your health.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Same-day crowns

Digital planning. A custom restoration.

A conversation about your care

CEREC technology allows the team to design and make selected ceramic restorations in the office. Your dentist will explain whether a same-day crown fits your tooth, bite and treatment needs.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Dental implants

Explore options for missing teeth.

A conversation about your care

An implant consultation considers your oral health, bone support and restoration goals. Ask about the stages of care, healing, maintenance and the options that suit your situation.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Full-arch options

A conversation about a complete smile.

A conversation about your care

The practice offers All-on-4 and full-arch implant options. Your dentist evaluates candidacy and discusses the support, restoration design and sequence of care before recommending a plan.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Cosmetic dentistry

Make your smile goals part of the plan.

A conversation about your care

Discuss tooth color, shape and the changes you would like to explore. Options listed by the practice include veneers, professional whitening, smile makeovers and cosmetic injectables.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Invisalign

A clear path to your alignment goals.

A conversation about your care

An orthodontic consultation reviews your teeth and bite. The team can discuss Invisalign clear aligners, the commitment involved and the follow-up needed for your individual treatment plan.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Sleep & jaw concerns

Start with a focused conversation.

A conversation about your care

Tell your dentist about snoring, a diagnosed sleep condition or jaw discomfort. The practice lists sleep-apnea treatment and therapeutic BOTOX. Your care begins with an assessment and discussion of suitable options.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Comfort & sedation

Tell us what helps you feel at ease.

A conversation about your care

Let the team know about dental anxiety, past experiences and your medical history. Nitrous oxide and oral sedation are listed among the practice options; your dentist determines what is appropriate.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Restorative care

Protect function. Restore confidence.

A conversation about your care

Crowns, bridges, fillings, dentures and implant restorations can address different dental needs. Your dentist explains the choices, expected maintenance and treatment sequence for your situation.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Children & families

Build comfort from the first visit.

A conversation about your care

The practice welcomes children and families. Share your child's questions or concerns with the team so the visit can be explained in a way that feels understandable and reassuring.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Modern technology

See more. Understand your options.

A conversation about your care

The office lists CEREC, digital impressions, 3D printing, CBCT imaging, digital X-rays and intraoral cameras. Ask how a recommended scan or digital tool fits into your own care.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Your treatment plan

Clear choices, one step at a time.

A conversation about your care

Discuss priorities, alternatives and costs before treatment begins. Ask for a written estimate, review the planned stages and tell the team about any scheduling or comfort needs.

Ask your dentist how the options fit your needs, what the plan includes and what to expect next.

Your consultation

Your goals

Bring your concerns, questions and priorities.

Your health

Share your medication list and relevant medical and dental history.

Your choices

Discuss alternatives, planned visits, costs and aftercare.

Your next step

Ask for a written plan and a way to reach the team.

One team. Your care.

Phuoc Tran, DDS

Dr. Phuoc Tran has practiced dentistry since 1996. His approach brings modern dental technology together with attentive, family-focused care. He helps patients understand their options and builds a plan around their individual needs.

Lauren Tran, DDS

Dr. Lauren Tran focuses on clear explanations, patient comfort and care for every age. She listens to your concerns and helps you understand preventive, restorative and cosmetic options.

Sarah Bui, DDS

Dr. Sarah Bui earned her undergraduate and dental degrees at The Ohio State University. She explains her recommendations clearly and helps patients feel informed and comfortable throughout their care.

Varena Farid, DDS

Dr. Varena Farid starts by listening. Her general dental care includes preventive, restorative and cosmetic services, with straightforward explanations and time for your questions.

Your goals & questions

Bring your thoughts to the conversation.
